Intervento 1.1-04-E
Modelli vegetazionali: Lh 15_1 / Lh 15_A
Posizione: sponda sinistra dell'Isarco, parte dell'ex campo sportivo
Situazione attuale: pineta, bosco misto, fascia prativa, campo sportivo
Situazione post operam: pineta, bordura di ruderali nell'area delle scarpe
Categoria intervento: 1.1 - Bosco - riforestazione
Obiettivo dell'intervento: Ricoltivazione delle superfici occupate durante la fase di canterizzazione, sviluppo di bosco di pini, terrazzato e ricco di specie, a substrato silatico, con componente elevata di latifoglie.
Descrizione dell'intervento: - Ricoltivazione fitta delle superfici con cespugli ed alberi adatti alla natura del luogo. Le specie costituenti il modulo d'impianto sono riportate nell'associazione Lh 15-1.
- Creazione di margini arbustivi del bosco graduato e ricco di varietà, con specie riportate nell'associazione Lh 15-A.
- Inserimento di elementi strutturali di legno secco (mucchi di stipa, ceppaie) per migliorare l'habitat riverasco della natrice e dell'erbetto.
Miscuglio per prato 1 (sulle scarpe miscuglio per prato 3)

Massnahme 1.1-04-E
Vegetationsmodelle: Lh 15_1 / Lh 15_A
Lage: linkes Eisackufer, Teilfläche des ehemaligen Sportplatzes.
Ist-Situation: Kiefernwald, Mischwald, Wiesenstreifen, Sportplatz
Situation post operam: Kiefernwald, Ruderalfläche im Böschungsbereich
Maßnahmenkategorie: 1.1 - Aufforstung des Waldes
Ziel der Maßnahme: Rekultivierung der Flächen, welche für die bauzeitliche Eisackverlegung beansprucht wurden, Entwicklung eines gestuften und artenreichen Silikat-Kiefernwaldbereiches mit hohem Laubholzanteil
Maßnahmenbeschreibung: - Dichte Rekultivierung der Oberflächen mit der Natur des Orts angemessenen Bäumen und Sträuchern. Die Gallungen dieses Pflanzenmoduls sind in der nachfolgend beschriebenen Pflanzengesellschaft Lh 15-1.
- Ausbildung der Strauchschicht des gestuften und artenreichen Waldes mit den Gallungen, die in der nachstehend beschriebenen Pflanzengesellschaft Lh 15-A.
- Anbringen von Totholzstrukturen (Reisighaufen, Wurzelstöcke) zur Verbesserung des Lebensraums von Ringelnatter und Bindschleiche in Gewässernähe.
Saatgutmischung 1 (auf Böschungen Saatgutmischung 3)
