

[illegible]

A cross-sectional diagram of a retaining wall system. On the left, a sloped soil mass is shown in yellow. A vertical retaining wall is depicted in the center, with a red vertical line indicating its face. To the right of the wall, a series of vertical dashed lines represent reinforcement or pile driving locations. The soil mass is bounded by a dashed line at the top and a solid line at the bottom. The wall is a solid yellow rectangle. The reinforcement consists of multiple vertical dashed lines of varying lengths, extending from the base of the wall towards the right edge of the diagram.

A diagram showing a retaining wall (red vertical line) supporting a soil mass (yellow area). A surcharge (grey rectangular area) is applied to the soil surface. The soil surface is sloped, and the wall is vertical. The diagram illustrates the effect of a surcharge on the soil pressure distribution.
