Oggetto: Stop drilling in Adriatic

Ministero dell'Ambiente e della Tutela del Territorio e
del Mare – D.G. Valutazioni e Autorizzazioni Ambientali

E.prot DVA-2015-0009937 del 14/04/2015

To whom it may concern,

Please do not allow for oil drilling to start or continue in the Adriatic. Oil drilling anywhere in the world doesn't come with great risk. We all know of catastrophic impact any spill has, however, in a sea as small as Adriatic, oil spill may cause irreversible damage. The eco-system in such a small sea is too weak to be able to recover from the damage the spill would cause. We, have responsibility to our future generations, and all other species on this planet to ensure clean seas, oceans, air and water.

Today we can do that, let's shift the focus on clean energy, and leave this planet a little better than we found it.

Thank you!
