

A wide river flows from the background towards the foreground. In the middle ground, a low, rocky dam or weir spans the width of the river, creating a series of white, frothy rapids. The water is a deep blue-grey color. Behind the rapids, a dense line of trees and shrubs forms a dark, continuous horizon. The sky above is a clear, pale blue. The overall scene is a natural landscape with a man-made or natural barrier in the water.

A wide, low dam or weir structure spanning a river, with water cascading over it, creating white foam. The background features a line of trees under a clear blue sky.

A wide river flows from the left towards the right, where a concrete dam is visible. The water is dark and rippled. The far bank is lined with a dense row of trees, mostly green with some autumnal tints. The sky is bright blue with scattered white clouds. The overall scene is a natural landscape with a man-made structure.
