

1980 1978

1980

A diagram of a chromosome consisting of two sister chromatids joined at a central point called the centromere. The chromatids are represented by two parallel blue lines, and the centromere is highlighted in green.

A diagram showing a green square block on a blue inclined plane. A vertical line segment connects the center of the block to the inclined plane, representing the normal force.

X(Y)

A diagram showing a curved surface, possibly a hill or a road. Two points, labeled 'a' and 'b', are marked on the surface. Point 'a' is at a lower elevation than point 'b'. Red arrows are drawn along the surface, pointing from 'a' towards 'b', indicating a direction of flow or movement.

a +

Diagram b shows a red line with a green dot on a blue line.
