SUBJECT:       NAFTASKI PROJEKT ZA JADRAN CRNE GORE  
                  OIL DRILLING PROJECT FOR MONTENEGRIN ADRIATIC

To Whom it May Concern

Perth, 25 February 2016

Dear Sirs,

Please register my deepest concern about the idea of oil drilling in the Adriatic. My concern is related to environmental and economic aspects of the proposal.

Environmentally: have we ever learn from the leak in the Mexican Gulf? If- or rather when- an accident of similar, or even lesser, scale occurs in the Adriatic, environmental impact will be devastating, due to the geographical position and (lack of) flushing of the Adriatic Sea. Economically, it will be devastating to the already struggling local economies which rely almost exclusively on tourism generated revenue. Loss of natural habitat and species would be unfathomable.

This is true of any position in the Adriatic, but the Montenegrin portion will equally impact the inner Adriatic and surrounding Mediterranean countries.

The future of energy resources and its pricing is questionable (including demand and pricing for crude oil), and I see no advantage to bear enormous and real risks, toward uncertain and unlikely gain.

I am positive that you would have studies by experts at your disposal which have addressed these issues (and more) from a very professional point of view, and I am saying nothing new or unknown.

I want to register my strong protest against drilling in the Adriatic.

Please leave Adriatic for what it is, and do your utmost to protect its shores and waters, its fishing stock and natural beauty, so that our children and grandchildren can continue to enjoy this marvellous and special place on the Earth.

Thank you for your kind attention.

Sincerely,

Ines Janca
