Text of LRQA Statement Attesting to OIMS Conformance to ISO 14001:1996

Lloyd's Register Quality Assurance has reviewed ExxonMobil's Operations Integrity Management System and has evaluated it against the requirements of the international standard for Environmental Management Systems, ISO 14001. The objectives of the review were to confirm that the design of the Operations Integrity Management System continues to meet the requirements of ISO 14001, to make a broad determination on the status of its implementation across the Corporation and to evaluate its ability to drive continual improvement.

Objective evidence was available to support the following conclusions, in line with the stated objectives of the review:

- The design of the Operations Integrity Management System has embraced the intent behind ISO 14001 and has addressed all of the individual ISO 14001 system elements
- The Operations Integrity Management System is in place throughout the Corporation. Improvements in its effectiveness over time have been reinforced by a disciplined and comprehensive self-assessment process.
- Deployment of the Operations Integrity Management System has contributed towards an overall improvement in the Corporation's environmental performance
- At the locations visited, individuals at all levels demonstrated a high degree of personal commitment to OIMS implementation and environmental care
- The integration of Environmental Business Plans into the annual planning cycle has strengthened the process for continual improvement of the Corporation's environmental performance

It is the opinion of Lloyd's Register Quality Assurance that the environmental management components of ExxonMobil's Operations Integrity Management System are consistent with the intent and meet the requirements of the ISO 14001 Environmental Management Systems Standard. We further believe ExxonMobil to be among the industry leaders in the extent to which environmental management considerations have been integrated into its business processes for ongoing operations and for the planning and development of new projects.
