

The diagram illustrates the relationships between various components in a system. It features a horizontal sequence of elements: 'Activity' (a blue box), 'Dataset' (a blue box with a dashed border), 'Program' (a blue box with a dashed border), 'Module' (a black box), 'Summary' (a black box), 'Project Summary' (a black box), 'External Activity' (a grey box), 'External Module' (a grey box), and 'Enable' (a green box). Arrows and other symbols indicate the flow and dependencies between these components. For example, a dashed arrow points from 'Activity' to 'Dataset', and a solid arrow points from 'Dataset' to 'Program'. A diamond symbol is placed between 'Module' and 'Summary', and another between 'External Activity' and 'External Module'. A green arrow points from 'Enable' to 'External Module'.
