

This architectural site plan illustrates the layout of a power plant complex. The central feature is the 'COMPLESSO EDIFICI PRINCIPALI' (Main Building Complex), which includes two large rectangular buildings flanking a central area with detailed mechanical and electrical schematics. To the left of this complex is a long, narrow rectangular structure, possibly a cooling tower or condenser, with a grid of internal components. To the right is a large, irregularly shaped building, likely a control room or administrative building. Further to the right is a 'MAGAZZINO' (Warehouse) and a smaller rectangular building. The site is surrounded by green spaces with various tree symbols. A large, hatched area on the left side of the plan represents an adjacent land parcel or a specific terrain feature. The plan also shows various access roads, parking areas, and utility lines connecting the different structures.
