## NATURA 2000 - STANDARD DATA FORM

For Special Protection Areas (SPA),  
Proposed Sites for Community Importance (pSCI),  
Sites of Community Importance (SCI) and  
for Special Areas of Conservation (SAC)

SITE **ITB010002**  
SITENAME **Stagno di Pilo e di Casaraccio**

### TABLE OF CONTENTS

- [1. SITE IDENTIFICATION](#)
- [2. SITE LOCATION](#)
- [3. ECOLOGICAL INFORMATION](#)
- [4. SITE DESCRIPTION](#)
- [5. SITE PROTECTION STATUS](#)
- [6. SITE MANAGEMENT](#)
- [7. MAP OF THE SITE](#)

Print Standard Data Form

### 1. SITE IDENTIFICATION

#### 1.1 Type

[Back to top](#)

B

#### 1.2 Site code

ITB010002

#### 1.3 Site name

Stagno di Pilo e di Casaraccio

#### 1.4 First Compilation date

1995-06

#### 1.5 Update date

2019-12

#### 1.6 Respondent:

<b>Name/Organisation:</b>	Regione Autonoma della Sardegna - Assessorato della difesa dell'ambiente - Servizio Tutela della Natura
<b>Address:</b>	Comune di Cagliari 80 Regione Autonoma della Sardegna - Assessorato della difesa dell'Ambiente Cagliari 09123 Via Roma
<b>Email:</b>	difesa.ambiente@regione.sardegna.it

#### 1.7 Site indication and designation / classification dates

<b>Date site proposed as SCI:</b>	1995-09
-----------------------------------	---------

<b>Date site confirmed as SCI:</b>	No data
<b>Date site designated as SAC:</b>	2017-04
<b>National legal reference of SAC designation:</b>	DM 07/04/2017 - G.U. 98 del 28-4-2017

## 2. SITE LOCATION

### 2.1 Site-centre location [decimal degrees]:

[Back to top](#)

<b>Longitude:</b>	8.248611
<b>Latitude:</b>	40.883056

### 2.2 Area [ha]

1882.0000

### 2.3 Marine area [%]

37.0000

### 2.4 Sitelength [km]:

0.00

### 2.5 Administrative region code and name

NUTS level 2 code	Region Name
ITG2	Sardegna

### 2.6 Biogeographical Region(s)

Mediterranean (100.00 %)

## 3. ECOLOGICAL INFORMATION

### 3.1 Habitat types present on the site and assessment for them

[Back to top](#)

Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
<a href="#">1110</a> B			299.09	0.00	P	D			
<a href="#">1120</a> B			380.73	0.00	M	B	C	B	B
<a href="#">1150</a> B			230.54	0.00	P	B	C	B	B
<a href="#">1160</a> B			4.38	0.00	P	D			

Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
<a href="#">1210</a> B			9.36	0.00	M	B	C	B	B
<a href="#">1310</a> B			1.95	0.00	M	A	C	A	A
<a href="#">1410</a> B			9.12	0.00	M	A	C	A	A
<a href="#">1420</a> B			19.2	0.00	M	A	C	A	A
<a href="#">1510</a> B			7.37	0.00	M	A	C	A	A
<a href="#">2110</a> B			7.02	0.00	M	B	C	B	B
<a href="#">2120</a> B			7.02	0.00	M	C	C	C	C
<a href="#">2210</a> B			7.26	0.00	M	B	C	B	B
<a href="#">2230</a> B			2.42	0.00	M	A	C	B	A
<a href="#">2250</a> B			0.0733	0.00	P	D			

**PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.

**NP:** in case that a habitat type no longer exists in the site enter: x (optional)

**Cover:** decimal values can be entered

**Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.

**Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

### 3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species			Population in the site							Site assessment

**Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles  
**S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

**NP:** in case that a species is no longer present in the site enter: x (optional)

**Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

**Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

**Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

**Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### 3.3 Other important species of flora and fauna (optional)

**Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles

**CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name

**S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

**NP:** in case that a species is no longer present in the site enter: x (optional)

**Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))

**Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present

**Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

#### Other Site Characteristics

Lo Stagno di Casaraccio (o delle Saline), poco profondo, occupa una superficie di circa 7,5 ha. E' separato dal mare da una sottile striscia sabbiosa ed ha uno sviluppo in lunghezza in senso perpendicolare alla linea costiera di circa 800 m contro una larghezza di soli 100 m. Lo Stagno di Pilo ha invece un'estensione di circa 1.2 Km<sup>2</sup>. E' separato dal mare da una sottile duna sabbiosa. A differenza dello stagno delle saline quello di Pilo è alimentato da piccoli ruscelli che ne addolciscono le acque in maniera irregolare in più punti. I due stagni sono posti alle estremità Nord e Sud del SIC; la parte di costa è bassa e sabbiosa e si estende, con andamento lineare, da Torre delle Saline, vicina allo stagno di Casaraccio, a Cabu Aspru, vicino allo stagno di Pilo. I fondali marini del SIC sono poco profondi, all'incirca tra i 5 e i 10 m, e caratterizzati dalla presenza di praterie di posidonia. I terreni affioranti nel sito sono prevalentemente ghiaie, sabbie, limi e argille sabbiose dei depositi alluvionali, colluviali, eolici e litorali travertini del periodo dell'olocene. Inoltre, ed in particolare nella parte inferiore del SIC alle spalle dello stagno di Pilo sono presenti conglomerati a matrice argillosa e arenarie di sistema alluvionale.

#### 4.2 Quality and importance

Le due aree stagnali sono raccordate dalla fascia litoranea della spiaggia delle antiche saline e delle basse dune che le caratterizzano con i diversi habitat della serie completa della vegetazione alofila e psammofila. Le acque salmastre accolgono significative estensioni della vegetazione vascolare delle acque salse (Ruppiaetea) che sfumano negli habitat delle alofite con dominanza di chenopodiacee succulente e nella vegetazione di paludi sub-salse (*Juncetalia maritimi*). Le dune accolgono una facies di vegetazione ad *Armeria pungens* che rappresenta il limite occidentale della distribuzione nel Nord Sardegna. Fragmiteti, canneti, tamariceti e alimieti ad *Atriplex halimus* si sviluppano in modo frammentario, sia nella fascia peristagnale, sia nelle retrodune. Per l'avifauna il Sito è tra le più importanti aree umide del Nord Sardegna.

#### 4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

Negative Impacts			
Rank	Threats and pressures [code]	Pollution (optional) [code]	inside/outside [i o b]
L	A01		I
L	A04		I

M	C01.01		I
M	D02.09		I
M	E01.01		I
L	F02.03		I
M	J01		I
L	K01.01		I

Positive Impacts			
Rank	Activities, management [code]	Pollution (optional) [code]	inside/outside [i o b]
L	A01		I
L	B		I
L	F02.03		I

Rank: H = high, M = medium, L = low

Pollution: N = Nitrogen input, P = Phosphor/Phosphate input, A = Acid input/acidification,

T = toxic inorganic chemicals, O = toxic organic chemicals, X = Mixed pollutions

i = inside, o = outside, b = both
