

This is an aerial photograph of a landscape, likely agricultural, with a large, irregularly shaped area highlighted in light green. This green area represents a watershed or a specific land management zone. Within this green area, a network of blue lines indicates a stream or river system. A prominent red line follows the western and southern edges of the green area, possibly marking a boundary or a specific path. The surrounding landscape is a patchwork of brown and green fields, with some darker areas that could be forests or wetlands. In the bottom right corner, there is a scale bar labeled '0' and '1,250 Meters'. In the top left corner, there is a north arrow pointing upwards, labeled 'N'.
